

用于临时血管结扎

Tetron Tape for Temporary Vessel Ligation

血管结扎带

TETRON TAPE

在手术中，使用止血钳进行结扎时，常常会损伤血管壁。所以，我们开发了结扎带提供了无损伤结扎解决方案。同时提供了不同颜色的结扎带以便于在实际使用中区分。

Vessel wall damage is frequently observed when forceps are used for vessel ligation. This tape was developed to resolve the problem by reducing damage while achieving simple stump ligation by tape distinction.

宽 Width	2mm、3mm、4mm、5mm
---------	-----------------
